

Acting Commissioner  
Jane Henney MD FDA

I am writing to urge you to please help insure that the public health is not compromised by being exposed to the hormone rBGH that is currently being used in the dairy industry.

I believe that this chemical is dangerous. I ask that you please immediately suspend Monsanto's license to sell rBGH. Not enough testing has been done on this hormone to adequately state that it is safe.

Thank You

Sincerely,

*Lori Cangilose*
